

PARTH DESAI

IoT Engineering Student

CONTACT

- +91 8980369814
- parthdesai2902@gmail.com
- Mumbai, Maharashtra

EDUCATION

School

2012 - 2022
SSC (Secondary School Certificate)
Essar International School
2022 - 2024
HSC (Higher Secondary Certificate)
Maharshi Vidhyalaya, Halvad
2024 - 2028
B.Tech in Internet of Things (IoT)
Thakur College of Engineering and
Technology,
Mumbai

AWARDS & CERTIFICATIONS

- 2nd Place | TechVision Poster Presentation (Zephyr 2024)
- MATLAB Onramp certified
- AI Ethics certified
- Cybersecurity Basics

SKILLS

- Programming: C++, C, Java, Embedded C (Arduino IDE, VS Code).
- IoT & Hardware: ESP32, Arduino Uno, ARIES (RISC-V), STM32, Raspberry Pi, IoT Sensors & Actuators.
- Design & CAD: Fusion 360, AutoCAD, Tinkercad.
- Tools & OS: Linux, Git/GitHub, Adafruit.io, MQTT, Tinkercad.

PROFILE

Results-driven IoT Engineering student at TCET combining technical expertise in smart systems (ESP32, STM32, RISC-V) and CAD modeling (Fusion 360) with proven event leadership. A strong communicator dedicated to driving collaborative innovation in the IoT space.

WORK EXPERIENCE

VICE CHAIRPERSON

OpenAI Club

2025 - 2026

- Orchestrated the inaugural Generative AI Workshop, managing end-to-end logistics and technical setup for 50+ attendees.
- Designed the strategic event calendar and facilitated resource planning to drive overall club engagement.

EVENT MANAGER

IEI Student Chapter

2026 - Present

- Spearheaded large-scale events like the BuildSmart Hackathon, directing cross-functional teams in seamless execution.
- Engineered the strategic event roadmap, scaling operations to include multi-day symposiums and driving record campus engagement.

PROJECTS

Smart Plant Watering System | ESP32, Adafruit.io

- Engineered an automated soil monitoring system with Adafruit.io cloud integration, reducing water usage by 30% via data-driven pump control.

Occupational Safety Monitor | MPU6050, RFID

- Engineered an RFID-authenticated worker safety system featuring MPU-based real-time fall detection and custom timer logic to trigger automated audio alerts for critical emergency response.

Research Paper: "Brain-Computer Interface (BCI) - Opportunities & Challenges"

- Co-authored a comprehensive analysis of the Indian BCI market, evaluating user feedback on invasive vs. non-invasive assistive healthcare technologies.
